Jakarta Selatan

Dear Sir,

I am writing to apply for the IT Programmer position in your company. After reading the job description on the poster, I was thrilled to discover all the requirements you need from applicants.

I graduated from State Vocational Highschool 1 Kepanyen and majored in software engineering. My skills in programming during vocational highschool were outstanding. Then, I continued my course at Brawijaya University majoring in software engineering.

I am a hard worker and always learning. I usually attend seminars or programming training to improve my skills. I master several programming language such as Java, Kotlin, PHP, Javascript, HTML, CSS, C#. I also master some PHP Framework such as Laravel and Codeigniter.

I have enclosed my curriculum vitae and I would welcome ~~an~~ an interview with you. I am ready to be interviewed anytime. Thank you for consideration.

Yours sincerely,

Wiradarma Nurmagika Bagaskara.
